

TesseraApp

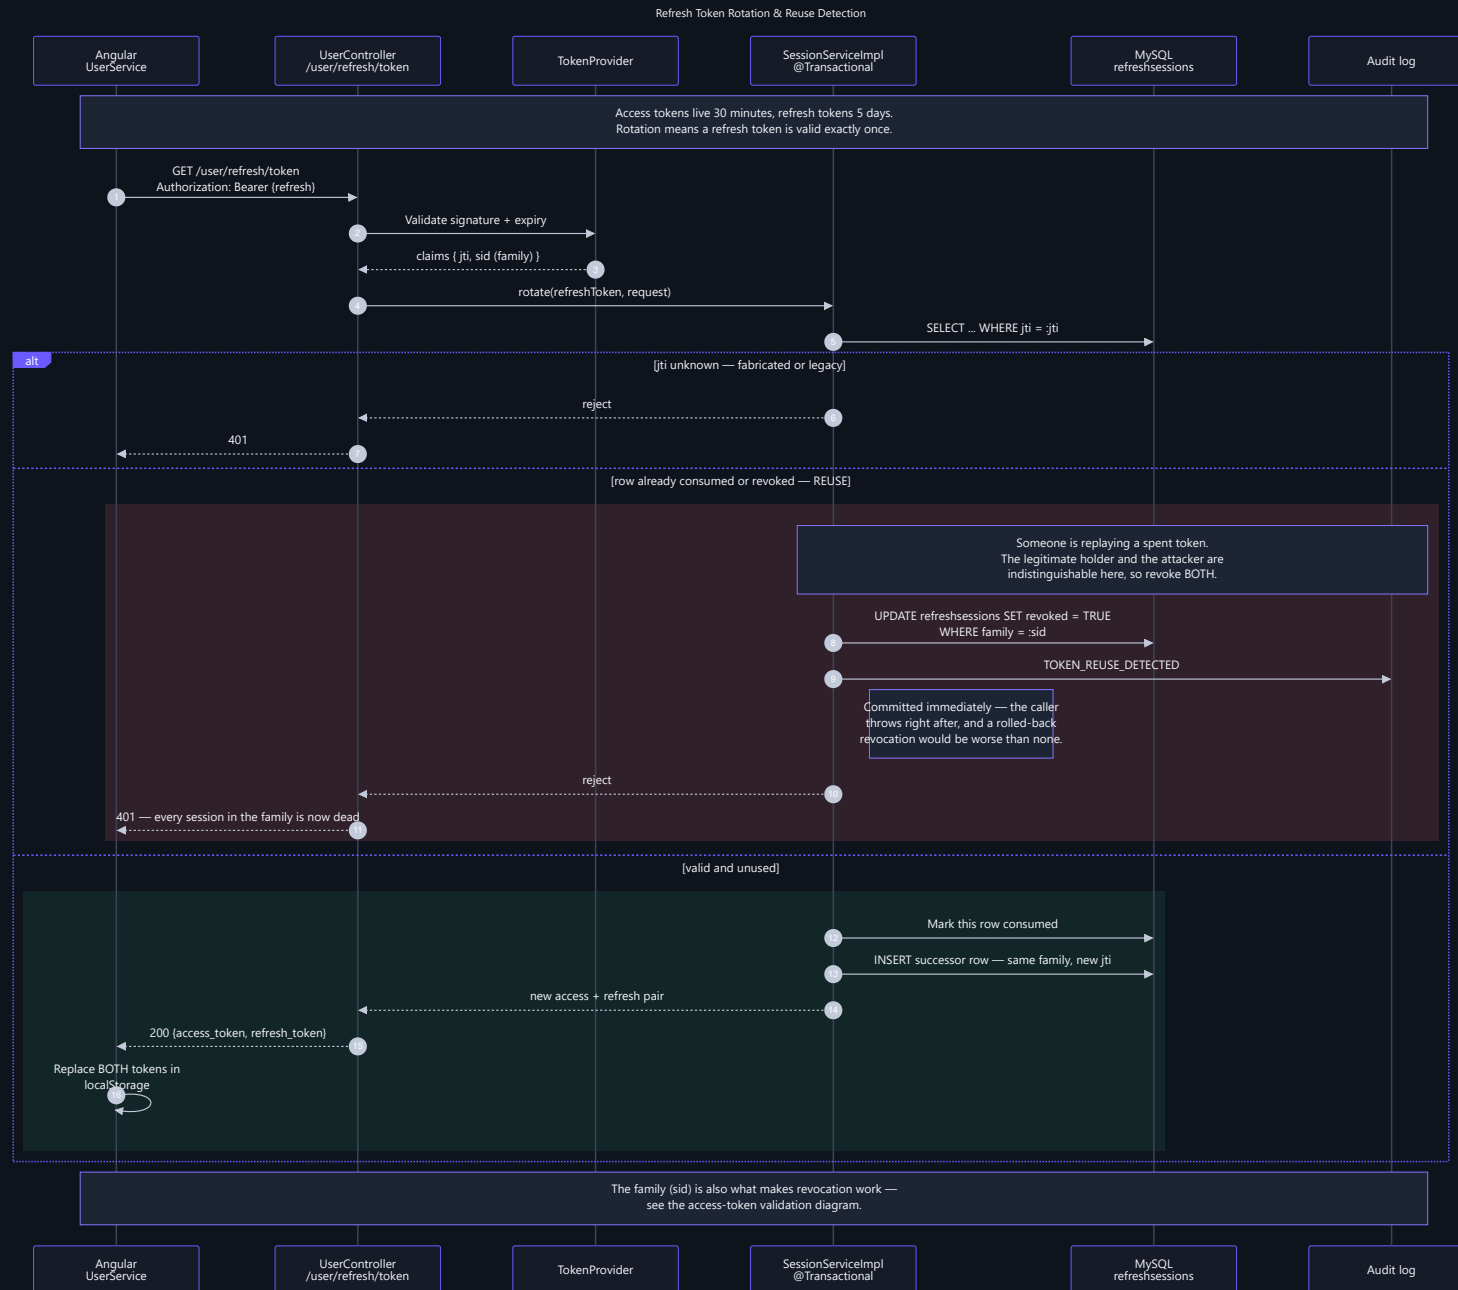

Authentication, authorization & session flows

9 sequence diagrams covering how a request is authenticated and authorized, how tokens are issued, rotated and revoked, and how the federated, enterprise-SSO and passkey sign-in paths differ. Generated from the Mermaid sources in `documentation/diagrams/src/`.

- | | |
|--|--|
| 01 Password Reset | 06 Per-Organization Enterprise SSO (OIDC & SAML) |
| 02 Login & Risk-Based Step-Up | 07 Passkeys — WebAuthn Enrolment & Sign-In |
| 03 Refresh Token Rotation & Reuse Detection | 08 Registration & Email Verification |
| 04 Request Path & Access-Token Validation | 09 Session Management & Revocation |
| 05 Federated Login (Google / GitHub / Microsoft) | |

Request Path & Access-Token Validation
